

# Modular Concrete Radiator

Freestanding / wall / hanging  
electric concrete radiator/heater

(vertical and horizontal mounting possibility)

Dimensions are 1200mm x 600mm x 30mm.

Made of special Polymer modified  
Ultra High Performance Concrete  
with integrated electric heater.

Design is minimalistic  
and according to the nature of the material  
it looks like a segment of concrete wall  
from the formwork.

Radiator panel is designed  
that it can be combined into larger surfaces

Has modular mounting points  
for various additional elements  
(towel hooks, evaporative air humidifier,  
wall, floor and hanging supports.
